About me

Full-Stack Developer with a background in software engineering and hands-on experience in web development, process automation, and AI solution integration. Experienced across multiple stacks: web development with **Angular** and **NestJS**, backend applications with **Java** and **Python**, and process automation with **n8n**, **Make**, and **Power Automate**. I have built complete applications with scalable, microservices-oriented architecture, relational database management, and cloud deployment. A delivery-focused technical profile, able to adapt quickly to new projects and teams.

Skills

Frontend

- TypeScript, Angular, JavaScript, HTML, CSS

Backend

- Java, Nest.js, Node.js, Python
- Kotlin, Android, REST APIs

Database

- MySQL, PostgreSQL, MongoDB, Microsoft Access

Automation and AI

- Python, N8N, Make, Power Automate, OpenClaw

Tools

- Despliegue y alojamiento web
- Git y GitHub
- WordPress
- AWS

Projects

Personal Web Portfolio

Developed a personal web **portfolio** using **React**, designed as an extension of my CV to showcase my technical skills, experience, projects, and the development process behind them. [Project Link](#)

RentAuto

Vehicle Rental Platform. **Full-stack web application** built with a modern architecture focused on scalability, security, and user experience.

- Stack:** Angular, TypeScript, NestJS, PostgreSQL, TypeORM, JWT, Stripe, n8n.
- Complete booking system with availability validation, online payments via Stripe, and **JWT authentication** with role-based access control (RBAC).
- Administrative dashboard with business metrics and automated reports via **n8n**.
- AI assistant** for users during the booking process and private Telegram chat with real-time analysis for administrators.

Experience

IT Support at OPINATOR

2026 - present

- Management and migration of virtual machines, including configuration, maintenance, and troubleshooting in production environments.
- Management and maintenance of **AWS** infrastructure (EC2), including instance configuration and administration.
- Daily work in **Linux** environments using the terminal, with **Git** for version control and change management.
- Diagnosis and resolution of configuration issues and technical incidents, identifying root causes to minimize operational impact.
- Participation in cybersecurity tasks, including log and incident monitoring, access and IAM management, and security patching and updates.
- Use of Claude Code in the terminal to streamline development and technical support tasks.

Database Developer & Digital Support Intern

Alenta

2026

- Management and maintenance of corporate databases using Microsoft Access.
- Creation of queries, forms, and reports to optimize internal processes.
- Organization and structuring of business data to improve operational efficiency.

Automation & Web Developer (Internship)

Naturprint

2025

- Developed and managed **MySQL** databases through table creation and SQL queries.
- Automated internal processes using **Power Automate**.
- Created and configured websites on **WordPress**.
- Optimized repetitive tasks related to data processing.
